

`int myArray[2][3] = {{1, 2, 3}, {4, 5, 6}};`

The diagram illustrates the syntax of a 2D array declaration and initialization. It shows the code `int myArray[2][3] = {{1, 2, 3}, {4, 5, 6}};`. The opening curly brace of the first row `{1, 2, 3}` is highlighted in yellow. The opening curly brace of the second row `{4, 5, 6}` is highlighted in pink. The closing curly brace of the first row `}` is highlighted in pink. The closing curly brace of the second row `}` is highlighted in pink. The closing curly brace of the entire array `}` is highlighted in yellow. Arrows point from the text labels to these specific braces.

encloses individual rows

encloses the entire array
