

```
#include <stdio.h>
#include <string.h>
```

```
int main(void) {
```

```
    char d[12] = "Hello";
```

```
    d[11] = 'x';
```

```
    char *t = "world!";
```

```
    //copies till the null character at end of "world!"
```

```
    strcat(d, t);
```

```
    printf("Concatenated string: %s\n", d);
```

```
    return 0;
```

```
}
```
